

NEW PRODUCT ANNOUNCEMENT

Coxreels Static Discharge Wheels

Tempe, AZ — Coxreels' SDH Series hand crank features heavy-duty construction for use in combustible environments. Compact, professional-grade all-steel construction static discharge models are configured to handle a galvanized or stainless steel cable in 100- or 200-foot lengths of 3/32-inch diameter covered with a vinyl-coated wire rope totaling 5/32-inch diameter.

Coxreels SDH Series has an integrated drag brake/reel stop to prevent freewheeling and cable uncoiling during storage or transport.

lighting product for outdoor commercial and petroleum applications.

BRUGG PIPESYSTEMS

Rome, GA — Brugg Pipesystems piping has been in use for over 15 years in thousands of service stations. Company executives boast that they have yet to see any deterioration of performance. Brugg piping is unique as it is both metallic and flexible. Executives will be on hand to discuss how the product's unique composition reduces the number of transitions and sources of leaks, and accelerates the installation process.

BUTLER CAPITAL CORPORATION, CONVENIENCE AND GAS FINANCE DIV.

Hunt Valley, MD — Butler Capital personnel will share information on its loans and leases with equipment manufacturers and distributors, as well as petroleum jobbers and marketers. Butler Capital provides needed assistance to PEI members when purchasing a business with or without a convenience store, car wash or other profit centers, or equipping, remodeling or re-imagining a station or store.

CAROLINA PRODUCTS, INC.

Charlotte, NC — Carolina Products, Inc. designs and manufactures custom-designed unitized electrical switchgear and building control solutions that are 100 percent tested prior to shipment. All systems are UL listed and comply with all NEC and local electrical codes to ensure an inspector's endorsement. CPI promises a speedy installation, national acceptance and standardization throughout its projects.

CATLOW

Tipp City, OH — Catlow executives will be on hand to discuss their latest company offerings. The company's product lineup includes the Cam Twist Magnetic Breakaway. The new technology allows the end-user to twist the breakaway in order to take it apart and inspect it for corrosion and wear, eliminating the need for a "remove by" date on the breakaway.
