

# SUPPLY LINE

Curtisbilt Corporation has developed a new shaft mount rocker system called the Split-Shaft™. This unique patented system consists of independent, interlocking shafts, and threaded tubular studs, which allow for easy valve lash adjustments. The unique design also allows for the use of different valve lengths without shimming or machining of the heads. This makes it a bolt-on, bullet-proof, shaft-style system. Initially available for the Chevy LS1, easily fits under the stock valve cover.

## Vertical and Horizontal Bar Solid Roller Lifters

Lunati solid roller lifters use a proprietary metallurgy for enhanced durability in high lift and high rpm engine applications. The light weight lifter body is precision ground to exact tolerances and is designed for engines with the GM .842" diameter lifter bore. The solid roller lifters are rebuildable and the pop-up style 72400LUN lifters make camshaft swaps a simple task since removal of the intake manifold will no longer be required.

## Multi-purpose Borescope

Inspect hard-to-see components without disassembly.

- Rugged nylon pistol grip handle
- Equipped with 2 service-free integrated solid-state LEDs-on UV and

one white light

- 10mm diameter shaft is water & abrasive-resistant
- Shaft can bend to 3" radius
- 24" flexible shaft
- Viewing angle: 40°
- Viewing distance: 0.4" to infinity
- Tip dia.: 0.4"
- 4-AA batteries (included)
- Order No. BSK-24

## Sunnen MPI 4562

Sunnen/DCM's MPI 4562 magnetic particle inspection system can detect both surface and internal cracks and imperfections in ferrous automotive parts. The latest model features state-of-the-art electronic controls with a digital display for convenient operations and easy visibility. You can also select from three modes including 4000 amp AC, 5000 amp HWDC (Half Wave DC) and 5000 amp FWDC (Full Wave DC). Sub-surface defects can be detected with HWDC and FWDC settings.

Katech Performance has introduced an oil cooler adapter (KAT-4722) that allows LSx engine builders to utilize the ports already

cast in the engine blocks to plumb the oil cooler with AN-10 hoses. Compared to stock cooler lines, this reduces backpressure in the oil system, which improves oil pressure and flow in the engine. The biliet aluminum adapter has clearly labeled "in/out" ports and has been compactly designed to accommodate existing wiring harnesses and full length headers, as well as other components in the immediate vicinity (thermal insulation is recommended for all wires).

## Revolutionary Rust Penetrant

Technicians and do-it-yourselfers everywhere herald the revolutionary power of Free All® Deep Penetrating Oil from Federal Process Corporation.

Free All Deep Penetrating Oil's unique silicone-free chemistry easily and quickly penetrates the corrosion surrounding the rusted part or fastener to break it free without laborious and time-consuming torching, drilling or chiseling.
