

Tension Gauge

The M. K. Morse Company now offers a Morse bandsaw tension gauge for measuring blade tension while the band saw blade is on the machine. The tension gauge checks for under-tensioned and over-tensioned conditions. Features include a cast, powder-coated body with calibrated gauge and a storage box with foam inserts. The gauge measures in pounds per square inch as well as kilograms per square centimeter. Proper tensioning bandsaw blades optimizes the blade life, resulting in precise cutting and reduces the opportunity for machine damage due to over-tensioning.

EasyInstall

T&S Brass and Bronze Works has rolled out its new EasyInstall Concealed Widespread faucets for the foodservice and plumbing industries. The new T&S-engineered and manufactured EasyInstall Concealed Widespread faucet is the same faucet with a new concealed body, which will provide cost savings and simplified, one-person installation. The EasyInstall saves up to 50 percent on labor cost and installation time, the company said. The new EasyInstall Concealed Widespread only affects the standard 8" T&S concealed product line. It does not affect 8" concealed widespread faucets with flex lines or those with different size centers.

Countertop Drain Cleaning Machine

The New Electric Eel Model CT countertop drain cleaner features a variable speed motor control that gives the operator maximum cable control and exceptional cleaning power from 75 to 350 RPM with constant torque. Engineered to clean drain lines between 3/4" and 2-1/2" diameter up to 50' long, the Model CT features a 1/5 HP, 90-volt DC motor and a hand tightened chuck. Available with a 2-way auto cable feed that keeps hands off rotating cable as it advances and retrieves cable with the push of a lever, the CT's stainless steel cable drum will not rust and resists denting.

Fountain of Drinks

Halsey Taylor has introduced a new addition to its Marblyte Contour drinking fountain series. Designed with educational facilities in mind, the new vandal-resistant, bi-level model (HRFGSEBP-VR) features a stylish, contemporary look and is manufactured from Marblyte, a premium non-porous solid surface material, for superior durability. The new fountain is also available as a freeze-resistant model (HRFGSEBP-VR-FR). Equipped with heavy-duty, vandal-resistant bubblers and push buttons, the new Marblyte Contour fountain can withstand almost any rough handling, the company said. In addition, the protective bottom cover plates, manufactured from galvanized steel, are also designed to further safeguard the unit from any damage due to frequent use in high-traffic areas.
