

**LIGHTING**

36 LED Rechargeable Work Lamp (No. 33006)  
The company's newest offering is a high-intensity rechargeable work lamp that provides maximum visibility via 36 LED bulbs that can run continually for up to three hours.

**OTHER STATED BENEFITS:**

- 4.8-Volt battery recharges in two to three

hours. AC and DC charging adapters are included.

- Features a magnetic back and hanging hook, to allow hands-free illumination
- Units easily fit into a glove box or toolbox.

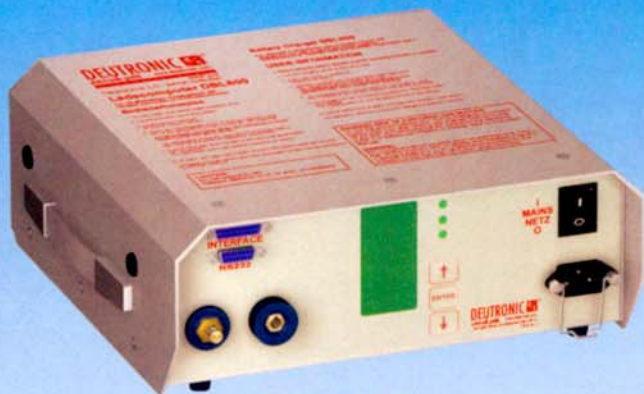

**GREATLITE**

**DON'T RISK ANOTHER EXPENSIVE CONTROLLER!!!!**

A Regulated Battery Charger/Power supply is absolutely necessary when Flashing/Programming late model vehicles.

**DBL-800**

Stable battery voltage is critical during programming. Any fluctuation, spiking or loss of voltage will interrupt programming, which could cause the controller to lock up or be damaged.

**Two critical items are:**

- Precise voltage control under changing load conditions
- Clean DC (AC eliminated)

Programming of modules requires the ignition key to be turned on for extended periods, without the engine running. This means that during the flashing/programming event, the vehicle's systems are operating from the vehicle battery alone. So, a regulated battery charger is critical to maintain voltage levels.

The Deutronic DBL800 helps reduce the risk of damaging control units by providing a continuous stable voltage supply under changing load conditions.

**DON'T PROGRAM ANOTHER ECU WITHOUT ONE.**

**HAND CLEANSERS**  
**Power Scrub Hand Cleaner**

Specially formulated for professional technicians, this new cleaner offers a quick and easy way to remove tough soiling, grease, adhesives, sealants, tar, oil and more.

**OTHER STATED BENEFITS:**

- Cleaner employs highly effective grit scrubbers, and can be used with or without water.
- Includes a blend of essential oils, aloe and lanolin to protect and condition hands.
- Available in several sizes: single-use packets, 15-oz bottle and 1-gallon pump bottle.
