AUTOMOTIVE TECH LINE

Diagnostic Hotline is a full-service automotive technical assistance line for the repair of all passenger cars and trucks sold and serviced in the United States and Canada, says

DIAGNOSTIC HOTLINE
The Right Answer. Right Away.

company. The hotline specialists are ASE-certified Master technicians, and each area has a specialist available to answer calls immediately, making it a "live" call service. The service is a pay-per-minute service; blocks of time can be prepurchased. In addition, a fax-back service is available when the customer only wants specific information faxed back without the further cost of speaking to a specialist.

A/C SEALANT DETECTION KIT

The QuickDetect A/C Sealant Detection Kit, Model No. ACSD, protects refrigerant identifiers and recovery machines against damage by immediately detecting the presence of harmful sealants in mobile A/C systems. The kit works on both R-134A and R-12 systems. The system includes an A/C coupler, hose, 10 test cartridges and a flowmeter. Connected to the A/C system, the unit is designed to mimic a leak. If sealant is present in the system, it solidifies in the disposable test cartridge and causes the flow meter to show "no flow." Except for the test cartridges, all of the kit's components are reusable, and additional cartridges are available separately.

HAND CLEANER

Power Scrub Hand Cleaner was developed for professional technicians looking for a faster, more powerful hand cleaner. Enhanced with "grit scrubbers," the cleaner is formulated with a blend of cleaning materials, essential oils, lanolin and aloe to remove tough soil, grease, adhesives, sealants, tar and oil while protecting hands and skin. The cleaner can be used with or without water.
