HERNON HIGH PERFORMANCE ADHESIVES AND SEALANTS

ISO-9002 REGISTERED

MORE THAN 5000
PRODUCTS AND 25
YEARS OF EXPERIENCE
IN PROVIDING
SOLUTIONS FOR
DESIGN ENGINEERS

HERNON MANUFACTURING

Products

pipe threads, joints, fittings, hoses, nozzles, bolts, compressors and plugs. Formulated with PTFE, the sealant is highly resistant to gasoline, petroleum-based solvents, kerosene, diesel oil, propane, butane, cutting oils, liquid petroleum gas, ammonia, aliphatic solvents and acids. It seals liquids at a maximum pressure of 10,000 psi and gases at a maximum pressure of 3,000 psi.

Ensure Quality Rivets

The FIS fastener inspection system identifies cracks and other defects via pattern recognition.

It can be used to inspect a wide range of formed fasteners, including rivets that have been formed using impact riveters and presses, and those

formed using orbital, spin or radial processes. In operation, the system compares a correct data signature to each actual rivet via machine vision inspection, thereby ensuring that any unacceptable installations are quickly identified.

Control DC Electric Tools

The enhanced QA Alpha DC electric fastening features an upgraded user interface, enhanced process capabilities and easy-to-use Embedded Toolbox software. Operators can link parameter sets in sequence for tightening multiple fasteners in a single workstation.
