Grease

White Grease with long-lasting white lithium, a premium, highly dense lubricating grease, is now available from **Federal Process Corporation**.

Specially formulated with long-lasting white lithium grease, the unique grease provides protection against abrasion and corrosion and is safe for use on any metal, plastic or painted surfaces, the company states. Available in a 14-ounce aerosol can, the thick, non-staining white grease forms a complete coating around any moving parts and will not run when used on vertical surfaces. Visit www.freealloil.com.

Quality, Convenience and Affordability

At CRP Industries, our number one goal is to continually enhance ways to service our business partners so that they can, in turn, better accommodate their customers. In considering these objectives, CRP Industries focuses on three key components — *Quality, Convenience and Affordability*.

Our ContiTech timing belt kits combine each of these attributes to ensure that your customers receive maximum performance for their investment. Most car manufacturers will recommend the components of the timing system—the belt, idler and tensioner pulleys—all be changed at the same time. ContiTech timing belt kits offer an easy and convenient way to have all the parts you need at a price that is substantially less than individual components.

Quality

CRP Industries offers its customers the peace of mind in knowing we only select partners who consider the importance of quality as much as we do. Every ContiTech timing belt kit meets or exceeds OEM quality specifications. In addition, ContiTech is quality certified through an alignment of international quality and safety standards known as ISO/TS16949:2002. It is CRP's promise to deliver a quality product every time.

Convenience

For the customer, our timing belt kits eliminate the dangers of buying incorrect or inferior parts. In order for the timing belt to function properly, it is essential that all the system components be a perfect fit every time. Replacing the timing belt and each component increases the life of the belt system and ensures the safety of the motorist. With CRP's ContiTech timing belt kit, there is no need to order each individual part.

Affordability

For the shop owner, CRP Industries realizes that we must continue to keep prices competitive in order to ensure your business' survival and growth. With our customer's budgets in mind, CRP continues to offer top quality timing belt kits from a recognizable brand name at affordable pricing. For your customer, timing belt kits offer an excellent opportunity to save money while not sacrificing the OE quality that consumers demand.

There are numerous additional benefits to the shop owner, jobber, dealer, and vehicle owner in changing all components of the timing belt system simultaneously.

- ▶ On average, replacing a timing belt system adds minutes of labor. Because the labor of the entire job, the tensioner and idler pulleys, a significant increase in the technician's job.
- ▶ The jobber, shop owner, or dealer can increase their profits by selling a timing belt kit instead of a timing belt alone.
- ▶ As all of the parts are included in the kit, the technician's job is simplified.

By boosting your business, you can simultaneously benefit from purchasing our ContiTech timing belt kits. Since 1954, CRP Industries has been providing our customers with the best timing belt parts at convenient prices. Why do we make this success directly dependent on your success?
